

# Weakening the Harmonized Framework?

*Challenges in the interaction between  
eIDAS 2.0 and NIS 2.0*

Date 27.10.2022

Presenter Dr. Kim Nguyen, Managing Director of D-Trust GmbH

## Harmonization and the eIDAS Regulation

Lesson learnt from "eIDAS 1.0": We need stronger harmonization

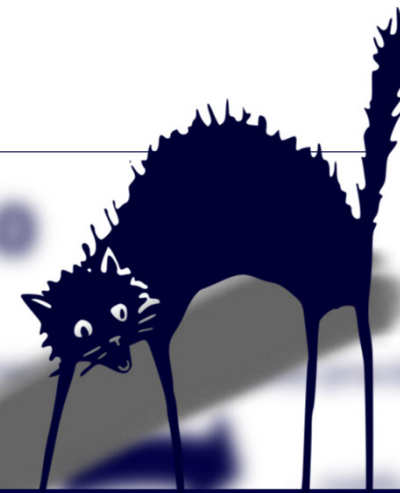

One Goal of the new eIDAS Regulation is the completion of a European trust space by harmonizing and clarifying the rules for trust service providers (TSPs) across the EU and ensuring that the same rules are applied in the same way across the EU

→ Article 19 sets harmonized security requirements for trust service providers and one supervisory body in each member state

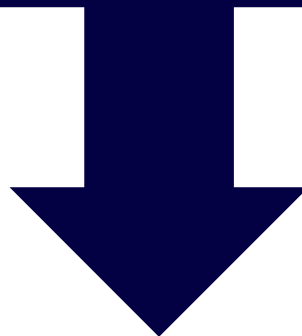

# ...Cancellation of article 19

## Future regulation with NIS Directive 2.0

The NIS 2.0 **Directive** proposed by the European Commission in December 2020 is intended to including trust services and electronic communications networks and services within the scope of this directive. Thus, the security requirements of the eIDAS regulation are to be replaced by those of the NIS 2.0 directive.

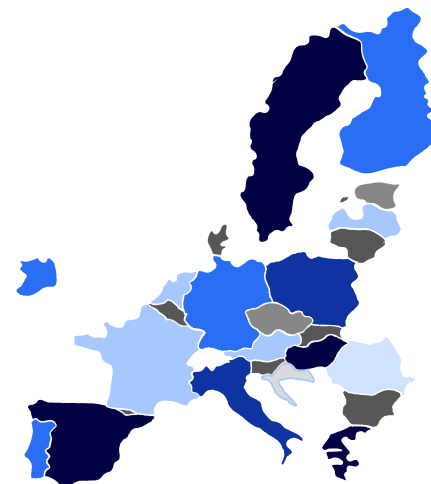

All the questions and problems will have to be taken into national law, which is proving to be the real challenge

## eIDAS regulation vs NIS Directive 2.0

eIDAS regulation

NIS Directive 2.0

The requirements must be replaced by **27 national laws** in a regulation that is directly applicable to all member states and thus the conformity assessment for qualified trust services will become many times more complex

# 2. Proposals

# Requirements for interplay between eIDAS 2.0 and NIS 2.0

1. Standardized Audit

2. Coordinated Supervisory Authorities

3. Europeanwide Harmonized Single Auditreport for all NCAs

# Requirements for eIDAS 2.0

## eIDAS 2.0 Proposal

- The required conformity assessment according to eIDAS article 20 should be performed in one audit report
- Standardized requirements and audits are necessary
- Conformity assessment have to according to adjusted/amended **ETSI Standards**

# Thank you.
