Lot 1 — Certification of cyber security skills of ICS/SCADA experts

The objectives of this study are to:

— perform a desktop research on the existing security components' and systems' certification approaches for smart grids,

- identify the gaps between different certification schemes (if any) among MSs and the challenges involved in further developing a harmonised certification approach,
- produce guidance for both the development of new, or improvement of already existing, and harmonisation of current smart grid certification (if any) both at national and at European levels,
- provide recommendations on how to develop new or improve existing approaches to a pan-European harmonised smart grid components' and systems' security certification.

Lot 2 — smart grid (cyber) security certification

The objectives of this study are to:

- perform a desktop research on the existing security certification approaches for smart grids; access to relevant existing statistical data is considered to be advantageous,
- identify the gaps between different certification schemes (if any) among MSs and the challenges involved in further developing a harmonised certification approach,
- produce guidance for both the development of new, or improvement of already existing, and harmonisation of current smart grid certification (if any) both at national and at European levels,
