

International Coalition on
Cyber Security Workforces
&
Wilton Park

“Cyber security talent development is a global issue, and international cooperation is critical to building and sustaining a cyber security workforce that is consistently understood and clear to navigate.”

Why did we meet as a Global Coalition on Cyber Workforces?

- **Shared global language** for skills
- Acknowledging **global best practice and commonalities** for countries on the cyber workforce development journey
- For countries developing professional standards and accreditation, there is a need for a space to discuss **mutual recognition**

Membership as of September 2024

Representation	Organisation Name
Australia	Australian Public Service Commission (APSC)
Canada	Canadian Centre for Cyber Security (CCCS)
Dubai, Government of	Dubai Electronic Security Centre (DESC)
European Union Agency	European Union Agency for Cybersecurity (ENISA)
Ghana	Cyber Security Authority
Ireland	National Cyber Security Centre Ireland (NCSC-IE)
Japan	Ministry of Economy, Trade and Industry (METI)
Singapore	Cyber Security Agency of Singapore (CSA)
United Kingdom	Department for Science, Innovation and Technology (DSIT)
United States	NICE, National Institute of Standards and Technology (NICE, NIST)

What was discussed?

- **The Coalition met regularly to discuss:**
 1. Common taxonomy and competency levels
 2. Baseline skills frameworks
 3. Working with international certification bodies
 4. Working towards mutual recognition of frameworks and standards

External experts and stakeholders:

Australian Cyber Network, CompTIA, CREST, ISC2, ISACA, Protection Group International (PGI), SANS, SFIA, and the UK Cyber Security Council.

Wilton Park 16 – 18 September 2024

- **What was the purpose?**

- International forum for conversation on commonalities and differences
- Brought global governments, NGOs, certification bodies, academia and industry together to agree what's needed going forward
- Opportunity to drive tangible international consensus on skills and professional standards (where applicable)
