

## Frank Lieser

### **Cyber Security Coordinator - High Commission for National Protection**

Frank started his professional career in 1989 as research engineer at the *Public Research Center Henri Tudor*, where he conducted work on broad band industrial networks for factory automation.

In 1992 Frank joined *Entreprise des Postes et Télécommunications Luxembourg* as IT engineer, where he managed Enterprise IT architecture, security and operations.

Strong of more than 20 years of experience in IT management, Frank joined in 2016 the *Agence nationale de la sécurité des systèmes d'information (ANSSI.LU)* as information security adviser to focus on information security, notably on information security governance and policies for classified and unclassified information systems and on the pre-transposition follow-up of the NIS directive.

Since 2020, Frank is responsible for the cybersecurity domain at the *High Commission for National Protection*, in charge of the coordination of the National Cybersecurity Strategy, large scale cyber incidents and crisis prevention and response, and the transposition of the NIS 2 directive.
